

Review of 'About Beverly' pages:

"I think that your articles 'About Beverly' - practitioner, teacher, lecturing, singer and musician, singing in Vietnam are tremendous. I've been reading the articles this morning and they made me feel so joyful and inspired. It's great to hear the way you prayed in such difficult and dangerous situations in Vietnam. It does inspire me with such confidence in God.

You gave up your brilliant career in music to help others, but I'm sure that to be a Christian Science healer and teacher is the greatest, the most satisfying career and the greatest joy of all.

Thank you for sharing your healing experiences. I know they will help so many."

J. N. Cairns, Australia

"For someone new to such a *radical idea* of spiritual healing - healing by prayer alone, I think your 'About Beverly' pages are brilliant. Your past experiences show me that you are a very real person - not someone who mysteriously prays and thinks good thoughts. The pages brought you and your present work into perspective - of real life situations, involving real people. They made you very real and knowable.

I also found your 'About Beverly practitioner' page added credibility to your motives and work as a genuine person and Christian Science Practitioner. It showed me that the role of a Christian Science Practitioner in the community is that of a reputable healer.

Your memoirs are very interesting and inspire my faith and interest. They help me to know about you and thus about the healing practice you run. I for one was very intrigued and captivated to read more. Thank you for sharing them."
