

Review of Beverly Goldsmith Christian Science practitioner:

I play a lot of sport, particularly *oztag* - a combination of rugby and flag football. During one game, I badly injured my knee. Next day I couldn't walk to the bus. I decided to call Beverly and ask for Christian Science treatment. I'd rung her a couple of times on my sister's recommendation about other matters and Beverly's prayerful help had removed my fears.

I told Beverly about the leg injury. She calmly gave me treatment over the phone. She explained that the substance of my being was not in anything material, like muscles, bones, and tendons. She assured me that I am spiritual. Running or falling couldn't change that fact. God is Spirit, and I am made in His image. That's my God-given, unchangeable identity. These spiritual truths were so uplifting. I felt my fear about the injury disappear.

We hung up, and she continued her prayerful treatment. By mid-afternoon my leg had improved dramatically. The pain left. I went jogging that night. I played every game for the rest of the season and scored more tries than ever before, thanks to Beverly's prayers.

Whenever I have challenges or need clarity on issues - whether they're physical, mental, or work-related, I immediately contact Beverly by phone or e-mail. We talk about how to pray concerning the particular difficulty I'm having. Beverly is reassuring, confident, calming. As a Christian Science practitioner I find her prayerful assistance to be invaluable.
